Ready to Build a Gorgeous Cedar Barn?

SINCE
1994

SIERRA

LOG & TIMBER

Do you own property and want to build a custom Red Cedar Barn?

Barns are versatile and can be used for housing animals, extra living space, a gorgeous event venue, or a combination of all these uses. Whatever you are hoping to do, let us design it for you!

The Process

1 USE TOOLS

Use our tools to plan and dream about your perfect barn. You can estimate the cost by providing the dimensions and features you want to have in your barn.

2 CONTACT US

Ready to move forward? Call us and tell us about your barn project.

3 DESIGN & ENGINEER

Together, we will design a barn to fit your exact needs. Our design team customizes the dimensions, features, and specifications to what you will use your barn for.

4 PURCHASE

Once the design is exactly how you want it, complete your purchase and your barn will be on its way to you.

5 SHIP

Next, we will engineer all the pieces you need to build. Each package will include lumber and other materials. All the supplies will be shipped to your building site.
